

## **ENGLISH IS SO MUCH FUN!**

In our school we offer the bilingual programme where we introduce English as a second language and not as foreign language.

Children are directly exposed to the language, songs, activities directly carried out in English!

The language becomes part of their routine and children start introducing the second language in their everyday life at school. How fun!

During the presence of the mothertongue teacher children are fully immersed in the language and they are in direct and continuous contact with the English language. Our class teacher and the English teacher collaborate and create a common educational programme where topics are explored both in Italian and English.

This specific type of programme will allow them to forge ahead in their primary school English studies, in developing fast-thinking processes and in becoming more intuitive.
